

SERVICE BRIEF

Microsoft 365 Security Assessment.

Identify vulnerabilities before they become breaches.

THE PROBLEM & THE APPROACH

Most organisations have security gaps in their Microsoft 365 environment that they don't know exist. Misconfigurations in authentication, sharing permissions, data management, and access controls create unnecessary risk exposing sensitive data.

CNNECT's Microsoft 365 Security Assessment provides a forensic-level review of security controls across your tenant, identifying specific vulnerabilities and prioritising remediation based on business impact. You receive a detailed report showing exactly where you stand and a clear roadmap for improvement.

Key challenges addressed

FIVE RISK AREAS

- 01 Account compromise exposure** Weak authentication policies and excessive administrative privileges.
- 02 Unknown security posture** No visibility into configuration weaknesses across Entra ID, SharePoint, Exchange, and Teams.
- 03 Data leakage risk** Users inadvertently sharing sensitive information externally through misconfigured permissions.
- 04 Compliance gaps** Inability to demonstrate security controls for audit, regulatory, or cyber insurance requirements.
- 05 Limited auditing capability** Insufficient logging and monitoring to detect suspicious activity or respond to incidents.

SERVICE OVERVIEW

A forensic review against the CIS benchmark.

The assessment reviews your Microsoft 365 environment against the CIS (Center for Internet Security) benchmark internationally recognised security standards used by thousands of organisations worldwide.

We assess security controls across six critical areas, scoring each against CIS levels and producing a risk-prioritised roadmap aligned to your licensing tier.

01 Entra ID	02 Auditing	03 Data Management	04 Email Security	05 Storage	06 App Permissions
----------------	----------------	-----------------------	----------------------	---------------	-----------------------

■ TIER 01 · E3

£3,000

E3 Assessment

Reviews 81 security controls appropriate for E3 licensing, focusing on foundational security configurations and compliance requirements achievable within E3 capabilities.

- 81 CIS controls assessed
- Foundational security baseline
- Compliance evidence pack
- Risk-prioritised roadmap

■ TIER 02 · E5

£4,500

E5 Assessment

Includes all E3 controls plus advanced security features available in E5 licensing Access Reviews, Privileged Identity Management, and Customer Lockbox providing comprehensive coverage of your enhanced security capabilities.

- All E3 controls plus E5 advanced
- Access Reviews & PIM
- Customer Lockbox & insider risk
- Defender / Purview coverage

DELIVERABLES

Findings report · Executive summary

Risk-prioritised roadmap & licensing analysis.

AFTER THE ASSESSMENT

Supported / DIY remediation

Half-day roadmap workshop included.
